PRODUCT DESCRIPTION

Increte Systems BOND-CRETE is an ASTM C-1042/1059 rated, high strength bonding agent with a high solids content for increased durability.

APPLICATION PROCESS

BOND-CRETE can be used to bond new concrete to old concrete surfaces, such as caps and stair facings. BOND-CRETE is a non-remulsifiable co-polymer that penetrates into the existing concrete surface and has excellent alkali resistance.

Coverage – Approximately 150 to 250 square ft. per gallon (3.785 L), depending on type and texture of surface and method of application.

Surface Preparation – Surface to be coated must be structurally sound and clean. Oil and grease should be removed with GREASE-A-WAY and water rinsing the surface until thoroughly clean. All surface coatings and sealers must be removed by sand blasting or other mechanical means.

Surface must be acid etched with 5 parts water to 1 part muriatic acid solution. Extremely hard, tight finished or polished concrete may require a second application with stronger solution. Rinse surface thoroughly with clean water and let dry completely before applying Bond-Crete.

Procedure – Apply BOND-CRETE liberally over entire surface with a roller, making sure not to leave any puddled areas. Let dry before applying overlay. Product will be tacky. NOTE: Extremely porous surfaces will require 2 coats, first coat must dry completely before applying second coat.

When applying BOND-CRETE to vertical surfaces, such as stair risers, make sure to remove the powdered release agent.

SAFETY PRECAUTIONS

CAUTION – This resin is not expected to be acutely toxic by single, oral, dermal, or inhalation exposure. It may be a mild to moderate skin and eye irritant. It is suggested that these materials be washed from the skin with soap and water.

Protect product from freezing.

KEEP AWAY FROM CHILDREN.
