PRODUCT DESCRIPTION

Increte Systems LIQUID RELEASE is a specially formulated liquid release agent for use indoors or outdoors where powder release agents are too dusty to use. This release agent forms a moisture barrier between the stamping tools and wet concrete to facilitate the release of the flexible tools.

APPLICATION PROCESS

LIQUID RELEASE should be sprayed lightly on the under-side of the stamping tool. Before stamping, the concrete should be allowed to cure to a spongy but firm surface that is not hard. Once the concrete is stamped, remove the stamping tool immediately but carefully and allow the concrete surface to dry. Reapply Liquid Release as needed throughout stamping process.

FINISHING

Remove any residual material with a 10:1 acid wash (10 parts water to 1 part muriatic acid) or clean with Grease-A-Way prior to sealing.

Benefits

LIQUID RELEASE can be used indoors and has a pleasant bubble gum fragrance not irritating to the nasal passages.

SAFETY PRECAUTIONS

CAUTION – Do not take internally, or allow prolonged contact with the skin. If swallowed contact a physician immediately.
KEEP AWAY FROM CHILDREN.
KEEP AWAY FROM OPEN FLAMES.

The flash point of this material is 148°F.

AVAILABILITY

Available through distributors or contact manufacturer.
