AIR MOVER MANUAL

TEMPEST™ TYPHOON™

Congratulations on your purchase of a Dry Air Technology Air Mover. Dry Air Technology Air Movers are conveniently small and extremely lightweight yet powerful enough to create airflow beyond your expectations. They have been engineered to be durable, long lasting and high performing. These air movers have been rigorously tested for heavy-duty us.

Your new unit was designed to provide the maximum performance. Please read this owner's manual carefully to insure that you get the most from your unit.

SAFETY INFORMATION

CAUTION!

Unit operates on alternating current: 110/120 volt, 60 Hz or 220/240 volt, 50 Hz

Do not operate your air mover with a cut or frayed power cord. Do not unplug your unit by pulling on its cord. Grasp the plug firmly and pull it out of the wall socket or power receptacle. The plug has a safety ground pin installed that must not be removed. If the pin is damaged or missing, have the power cord replaced at once. Visually inspect the power cord before each use. Ignoring these safety precautions may result in a fire or an electric shock.

To reduce the risk of fire or electric shock, do not use this fan with any solid state speed control device.

Never operate electrical equipment in standing water. There is a shock hazard.

Never drop the unit. Sudden and severe impact may result in damage to internal components.

Your air mover should never be operated with the safety grills removed. Personal injury may result.

Drop cloths or other loose fabrics can be drawn against the unit thereby restricting airflow. This condition may cause the unit to overheat. Keep the air inlet clear of any obstructions.

Save the shipping carton in case your air mover must be returned for repair.

This unit should never be serviced or cleaned while it is plugged into a live electrical power source.

WARNING: Ignoring these safety precautions may result in serious personal injury.

TEMPEST™ TYPHOON™

OPERATING INSTRUCTIONS

Please inspect your unit upon receipt for any freight damages. Be sure to keep all original packaging. Original packaging will help protect unit from freight damage upon return.

If you discover any damages during inspection, please contact Dry Air Technology.

The unit as packaged is ready to be put into service. If you have a 220v model, attach the appropriate plug for your region.

Inspect the unit completely for any shipping damage. Place the unit on the ground or on a very stable platform.

Plug the unit into a grounded alternating current circuit and switch the unit on.

MAINTENANCE

When turning on equipment for use, always check to make sure the unit is running properly.

When the unit is first turned on, check for excessive vibration or noise. This would indicate a major problem. If your unit is running abnormally, troubleshoot to find the cause and make any necessary adjustments or repairs. Do not allow the unit to run when problem persists. A simple adjustment problem can turn into complete motor failure if not corrected.

Warning

Disconnect the unit from the power supply before cleaning or servicing.

SPECIFICATIONS

| Model | Voltage | Motor | RPM | Speed | Amps | Max | Dimensions | Weight |
|---------|--------------|-------|------|-------|------|------|-------------------------|--------|
| | | | | | | SP | $(H \times L \times W)$ | |
| Tempest | 230V 50/60Hz | .4 HP | 1050 | 2 | 2 | 1.50 | 17" x 18.5" x 15.5" | 28 lbs |
| Tempest | 115V 60Hz | .4 HP | 1050 | 2 | 4 | 1.50 | 17" x 18.5" x 15.5" | 28 lbs |
| Typhoon | 115V 60Hz | .4 HP | 1050 | 3 | 4 | 1.50 | 17" x 18.5" x 15.5" | 28 lbs |

Wheel Size for all units is 9.5" x 9.5".

ATTN: PRODUCT UPDATE

The new Typhoon Air Mover is now equipped with a .4 HP motor, GFCI receptacle and 15 amp breaker. The GFCI Receptacle and 15 amp breaker gives you the ability to plug one fan into another, reducing the chaos and clutter of extension cords and power cords crisscrossing the drying site. This outlet is GFCI (Ground Fault Circuit Interrupter) protected and incorporates a dedicated circuit breaker. You can plug three Typhoon Air Movers into each other on a 15 amp circuit. For your convenience a 3mm Allen Wrench is included to remove the intake grill to provide access to the blower wheel and motor.

| Problem | Cause | Solution |
|-----------------------------|---|--|
| Unit will not run. | 1. GFCI has tripped | 1. Reset GFCI, it must be a properly |
| | | grounded receptacle. |
| | 2. No power to unit. | 2-A. Check the 15 amp circuit breaker |
| | | 2-B. Check the building fuse or circuit |
| | | breaker. Reset breaker or replace fuse. |
| | | 3. 3. Place in "ON" position. |
| | 3. Switch not on. | 4. Replace switch. |
| | 4. Switch is faulty. | 5. Perform continuity check, using |
| | 5. Faulty/broken cord or motor wire. | volt/amp meter. Repair/replace faulty broken wire. |
| Unit runs but fan makes | 1. Unit has been severely jolted causing fan | 1. Remove motor and replace damaged |
| loud scraping noise. | to rub against housing. | motor mounts. |
| | 2. Unit has been severely joited causing | 2. Replace fan blade. |
| Unit runs but vibrates | 1 Severe jolt has bent motor shaft causing | 1 Remove and replace motor |
| excessively. | unit to be out of balance. | |
| | 2. Fan blade damaged. | 2. Replace blade if necessary. |
| | 3. Dirt build up on one side of | 3. Clean fan blade. |
| | fan blade. | |
| Unit runs but fan does not | 1. Fan is jammed against housing. | 1. Remove motor and replace damaged |
| turn. | | motor mounts. Replace fan blade if |
| | 2 Capacitor wire has broken/come loose | 2 Repair/replace wires/capacitor as |
| | capacitor has failed. | necessary. |
| | 3. Housing has been damaged such that it | 3. Replace housing/unit as necessary. |
| | presses on fan blade. | |
| Unit runs briefly, and then | 1. Motor bearings are failing or motor has | 1. Replace motor. |
| snuts off. | developed an internal electrical fault. | |
| | 2. make yill and/or exhaust yill is obstructed | 2 Remove obstruction |
| | 3. Excessive duct length | 3. Reduce the duct length to the |
| | | recommended maximum. |

TROUBLE SHOOTING

Trouble Shooting

| Problem | Cause | Solution |
|--|--|---|
| Unit will not run. | 1. No power to unit. | 1. Plug unit in. Check circuit breaker. |
| | 2. Switch not on. | 2. Place in "ON" position. |
| | 3. Switch is faulty. | 3. Replace switch. |
| | 4. Faulty/broken cord or motor wire. | 4. Perform continuity check, using volt/amp meter. Repair/replace faulty broken wire. |
| Unit runs but air mover makes loud scraping noise. | 1. Unit has been severely jolted causing blower wheel to rub against housing. | 1. Remove motor and replace damaged motor mounts. |
| | 2. Unit has been severely jolted causing housing to deform. | 2. Replace blower wheel. |
| Unit runs but vibrates excessively. | 1. Severe jolt has bent motor shaft causing unit to be out of balance. | 1. Remove and replace motor. |
| | 2. Air mover blade damaged. | 2. Replace blade if necessary. |
| | 3. Dirt build up on one side of air mover blade. | 3. Clean air mover blade. |
| Unit runs but blower wheel does not turn. | 1. Blower wheel is jammed against housing. | 1. Remove motor and replace damaged motor mounts. Replace blower wheel if necessary. |
| | 2.Capacitor wire has broken/come loose, capacitor has failed. | 2.Repair/replace wires/capacitor as necessary. |
| | 3. Housing has been damaged such that it presses on blower wheel. | Replace housing/unit as necessary. |
| Unit runs briefly, then shuts off on overload. | 1. Motor bearings are failing or motor has developed an internal electrical fault. | 1. Replace motor. |
| | 2. Intake grill and/or exhaust grill | 2. Remove obstruction. |
| | is obstructed. | 3.Reduce duct length to |

Dry Air Technology 10 Year Limited Warranty Axial and Centrifugal Air Flow Products

Warrantor: Dry Air Technology, 313 North Oak Street, Burlington, WA 98233. Telephone: 888-755-9176, local: 360-755-9176, fax: 360-755-9236.

Who Is Covered: This warranty extends to the original end-user of axial and centrifugal air flow devices manufactured by Dry Air Technology, and may not be assigned or transferred.

Warranty Period: The term of the warranty coverage from the date of purchase is:

10 years on the cabinet, chassis and housing

1 year on parts, labor and reasonable shipping costs, excluding filters and accessories.

Warranty Coverage: Dry Air Technology warrants that, for one year, axial and centrifugal air flow devices manufactured by Dry Air Technology will operate free from defects in material or workmanship, or Dry Air Technology, at its option, will repair or replace the defective part(s), free of charge.

Dry Air Technology further warrants that for a period of ten (10) years, the cabinet, chassis and housing of axial and centrifugal air flow devices manufactured by Dry Air Technology, will be free from defects in material or workmanship, or Dry Air Technology, at its option, will repair or replace the defective part(s), provided that all labor and shipping costs for the defective part(s) shall be borne by the end-user.

This warranty does not cover any defect, malfunction, etc. resulting from misuse, abuse, lack of normal care, corrosion from chemicals, freezing, tampering, modification, unauthorized or improper repair or operation, accident, acts of nature or any other cause beyond Dry Air Technology's reasonable control.

End-User Responsibilities: Warranty service must be performed by a firm or individual authorized by Dry Air Technology. If the end-user is unable to locate or obtain warranty service from an authorized firm or individual, he should contact Dry Air Technology at the above location, which will arrange for covered warranty service. All covered warranty service will be performed during normal business hours.

Limitations and Exclusions: If any part of a axial or centrifugal air flow device manufactured by Dry Air Technology is repaired or replaced, the new part shall be warranted only for the remainder of the original warranty period of the air flow device (but all warranties will be extended by the period of time, if any, that the Dry Air Technology air flow device is out of service while waiting for covered warranty service).

UPON THE EXPIRATION OF THE WRITTEN WARRANTY APPLICABLE TO THE DRY AIR TECHNOLOGY AIR FLOW DEVICE OR ANY PART THEREOF, ALL OTHER WARRANTIES IMPLIED BY LAW, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL ALSO EXPIRE. ALL WARRANTIES MADE BY DRY AIR TECHNOLOGY ARE SET FORTH HEREIN, AND NO CLAIM MAY BE MADE AGAINST DRY AIR TECHNOLOGY BASED ON ANY ORAL WARRANTY. IN NO EVENT SHALL DRY AIR TECHNOLOGY, IN CONNECTION WITH THE SALE, OPERATION, REPAIR OR REPLACEMENT OF ANY DRY AIR TECHNOLOGY AIR FLOW DEVICE OR PART THEREOF BE LIABLE UNDER ANY LEGAL THEORY FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES INCLUDING WITHOUT LIMITATION WATER DAMAGE (THE END-USER SHOULD TAKE PRECAUTIONS AGAINST SAME), LOST PROFITS, DELAY, OR LOSS OF USE OR DAMAGE TO ANY REAL OR PERSONAL PROPERTY.

Some states do not allow limitations on how long an implied warranty lasts, and some do not allow the exclusion or limitation of incidental or consequential damages, so one or both of these limitations may not apply to you.

Legal Rights: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

DRY AIR TECHNOLOGY, BURLINGTON, WASHINGTON
